*SESE - Time capsule (to do in your spare time during the week)

- Let's try making a Time Capsule to mark this unusual time we're living through. I'll post some suggestions on what you could include in your capsule, you can photocopy them or create your own version.
- Try and represent the people in your family, your pets, your hobbies, your likes and dislikes in the form of pictures, objects or written evidence.
- Remember you want to make it as interesting as possible and give good insight into what your life is like right now.
- Choose carefully where you're going to store the time capsule. It should be somewhere you won't get at for years to come. The attic maybe ?

Tuesday April 28th

20 squats

Starlight read pg. 165

Starlight pg. 168 sec. E

20 star jumps

Work it out pg. 58 - Tue

Planet Maths - pg. 112 Sec. A, C + D - **Look at those video tutorials again.**

- Remember to convert decimals and percentages into fractions before trying to find a piece of a number.
- To find a fraction of a number we divide it by the bottom of the fraction then multiply the answer by the top of the fraction.
- To convert a percent to a fraction you put it over a hundred, don't forget to simplify if possible.
- e.g. 25% is written as $25/100$ (25 over a 100) then simplified to $1/4$ so $25\% = 1/4$
- or $35\% = 35/100 = 7/20$ so $35\% = 7/20$.
- To convert a decimal to a fraction you put it over a hundred or ten depending on the amount of digits after the decimal point and then simplify if possible.
- e.g. 0.5 is written as $5/10$ (5 over 10) then simplified to $1/2$ so $0.5 = 1/2$
- e.g. 0.12 is written as $12/100$ (12 over 100) then simplified to $3/25$ so $0.12 = 3/25$
